

#### Job Brief:

We are looking for a Python Developer to join our engineering team and help us develop and maintain various software products. The incumbent should have significant experience in development with the use of Python/ Django. Python Developer responsibilities include writing and testing code, debugging programs and integrating applications with third-party web services. To be successful in this role, you should have experience using server-side logic and work well in a team. Ultimately, you'll build highly responsive web applications that align with our business needs.

**Softices** is **Urgently** looking for **Python Developer** for the current vacancies we have. As this is an urgent requirement, so only interested candidates apply.

We don't just offer **Job**, but we offer **Career growth**.

**Position:** Python Developer

**Experience:** 0-2 years

Salary: Don't worry about it, if you have right skills.

# **4** Your Responsibilities:

- Write effective, scalable code
- Develop back-end components to improve responsiveness and overall performance
- Integrate user-facing elements into applications
- Test and debug programs
- Improve functionality of existing systems
- Implement security and data protection solutions
- Assess and prioritize feature requests
- Coordinate with internal teams to understand user requirements and provide technical solutions

### Skill-set we are looking for:

- Work experience as a Python Developer
- Proficient in Python and similar technologies (like Django, Flask or Pyramid).
- Excellent Problem solver and proficient coder, strong in Data Structures and algorithms.
- Familiarity with both SQL and NoSQL databases
- Expertise in REST API design and implementation.
- Hands on experience on code versioning with GitHub, Bit Bucket (or other similar git clients) and deployment to staging and production servers.
- Implemented MVC architecture in developing the web application with the help of Django framework.

# **Qualification & Experience:**

Diploma and Degree.
